

Fareed Mirza

Head of Research

Dr. Fareed Mirza is Head of Research at the Novartis Foundation, overseeing and guiding the foundation and its partners in the generation and evaluation of evidence-based health outcomes.

Prior to joining the foundation, Fareed has held various scientific roles in early research and late clinical development at Novartis. In his last role in Novartis Pharmaceutical Development, he was responsible for building scientific and clinical research capabilities across Africa, Asia and Latin America. Prior to his extensive drug R&D experience, he was a post-doctoral scientist at the University of Oxford, working in vaccine research and evaluating study endpoints in early phase clinical trials.

Fareed holds a DPhil in Immunology from the University of Oxford, United Kingdom, and a Masters in Immunology from Imperial College, United Kingdom.
